1.0 OVERVIEW OF INTERNATIONAL JUDGING SYSTEM

The Technical Panel:

The technical panel consists of the Technical Controller (TC), Technical Specialist (TS), The Assistant Technical Specialist, Data-operator and Replay-operator. The Technical Controller and The Technical Specialists identify the elements executed by the skater. The Data-operator assists The Technical Controller and The Technical Specialists by entering the identified elements into the computer system. The Replay-Operator controls a slow motion video replay system, which supports The Technical Controller and The Technical Specialists in the identification of the executed elements.

The Technical Specialist – in collaboration with The Assistant Technical Specialist – identifies and calls all the executed elements as well as levels on spins and step sequences. The Technical Specialist also identifies illegal elements and falls. The Technical Controller supervises The Technical Specialists and The Data Operator and proposes corrections – if needed – in alignment with executed elements and levels identified by The Technical Specialists. In case of disagreement with the proposed correction by The Technical Controller, the original decision made by The Technical Specialists will be upheld. If The Technical Specialist and The Assistant Technical Specialist disagree on an element or a level, The Technical Controller will have the deciding vote. The Technical Controller also approves and corrects the identification of illegal elements and falls.

Judges:

The main focus for judges is to assess the quality of any element executed as well as the quality of the program components. The assessment of the judges is based on specific criteria for each element, which provides an extensive evaluation of each skater and their skills. The judges do not compare the skaters against each other, which allows each judge to focus on the quality of the executed elements and program components. The points are allotted into the system through a touch screen. It is possible for the judges to review the executed elements in normal speed.

The Technical Score:

Every element contains a fixed base value that is based on the difficulty of the elements as well as any level awarded. The judges award a grade of execution (GOE) to each element, which either reduces or increases the value of the element. When a skater has executed an element, the element is identified by The Technical Panel and the element will immediately be visible on the judges' screens. The judges each award the elements with a GOE on a scale from +5 to -5. The final technical score consists of the values of the elements, the average of the judges' GOE's and the levels given by The Technical Panel.

Program Components Scores:

Aside from the technical side, the judges also award points for program components on a scale ranging from 0,0-10,0 with intervals at 0,25 points. The program components consist of; Skatings Skills, Transitions, Performance, Composition, Interpretation. The judges' scores for each program component is multiplied by a factor determined by the different age groups.

The Total Score:

The total score is the sum of the technical score and the program components score, including deductions for falls or time violations etc. The total score for the short program and free skate constitutes the overall score for the competition. The skater that obtains the highest overall competition score is also the winner of the competition.

4.0 PROGRAM CONTENT FOR M-SKATERS

4.1 Senior M Ladies – Short program

Age requirement: No age limit

Test requirement: Gold

Length of program: 2.40 min ± 10 sec

- a) Double Axel or Triple Axel
- b) Triple jump
- c) Jump combination consisting of one double and one triple jump or two triple jumps.
- d) Flying spin, min. 8 revolutions
- e) Layback/sideways leaning spin or sit/camel spin with no change of foot, min. 8 revolutions (basic position in this spin must be different from the one in d)
- f) Spin combination with only one change of foot, min. 6 revolutions on each foot
- g) One step sequence

Note

Double/Triple Axel can only be performed once in the short program.

The solo jump (b) must be different from that used in (a) and different from the jumps in the jump combination (c). Jumps used in the jump combination (c) can be the same but have to be different than the jumps used in (a) and (b).

Jumps which do not satisfy the requirements – including wrong number of revolutions – will have no value, and will block a jumping box, if one is empty.

Program Components, factor 0.8

Skating Skills, Transitions, Performance, Composition, Interpretation of the music

Falls:

A fall will give a deduction of 1 point for first and second fall. 2 points will be deducted for the third and fourth fall. 3 points will be deducted for five falls or more.

Halftime Bonus:

For jump elements performed after 1 minute and 20 seconds, a half time bonus of 10% will be awarded. Half time bonus can only be given once in the short program (last performed jump element).

4.2 Senior M Ladies – Free skating

Age requirement: No age limit

Test requirement: Gold

Length of program: 4 min ± 10 sec

- a) Maximum of 7 jump elements
One must be an Axel or Axel-type jump
Maximum three jump combinations or sequences. Only one of the jump combinations may consist of three (3) jumps and the other two may consist of two (2) jumps.
- b) Maximum of three different spins
One must be a spin combination, min. 10 revolutions, one flying spin, min. 6 revolutions and one spin in one basic position, min. 6 revolutions
- c) Maximum 1 step sequence
- d) Maximum 1 choreographic sequence

Note

All double jumps may only be executed twice in the free skating. Of all triple and quad jumps, only two (2) jumps can be executed twice. Of the two (2) repetitions, only one may be a quad jump. If at least one (1) of the repetitions is in a jump combination or a sequence, both repetitions will receive full base value. If a jump is executed twice as a solo jump, the second jump will only receive 70% of the original base value.

Program Components, factor 1.6

Skating Skills, Transitions, Performance, Composition, Interpretation of the music

Falls:

A fall will give a deduction of 1 point for first and second fall. 2 points will be deducted for the third and fourth fall. 3 points will be deducted for five falls or more.

Halftime bonus:

For jump elements performed after 2 minutes, a half time bonus of 10% will be awarded. Half time bonus can be given three times in the Free Skate, as a maximum (last three performed jump elements).

4.3 Senior M Men – Short program

Age requirement: No age limit

Test requirement: Gold

Length of program: 2.40 min ± 10 sec

- a) Double Axel or Triple Axel
- b) Triple or Quad jump
- c) Jump combination consisting of one double and one triple jump or two triple jumps or one Quad and one Double jump or one Quad and one Triple jump.
- d) Flying spin, min. 8 revolutions
- e) Sit/camel spin with only one change of foot, min. 6 revolutions on each foot (basic position in this spin must be different from the one in d))
- f) Spin combination with only one change of foot, min. 6 revolutions on each foot
- g) One step sequence

Note

If a Quad jump is performed in the jump combination (c) a different Quad jump may be performed in the solo jump (b) Double/Triple Axel can only be performed once in the short program.

The solo jump (b) must be different from that used in (a) and different from the jumps in the jump combination (c). Jumps used in the jump combination (c) can be the same but have to be different than the jumps used in (a) and (b).

Jumps which do not satisfy the requirements – including wrong number of revolutions – will have no value, and will block a jumping box, if one is empty.
